DETAILED ACTION

Claims 45-57 are pending in this application. Applicant's arguments filed 10-1-02 will be addressed in the next communication from the Examiner. In view of the vastness of the claimed subject matter, additional restriction of the claims is required.

Election/Restrictions

Due to the numerous variables in the claims, R1, R2, W, X, Y, and Z, and their widely divergent meanings, a precise listing of inventive groups can not be made. The following groups are exemplary:

Group I claims 45-57, drawn to compounds in formula (II) wherein W is optionally substituted aryl, Z is imino, X is O, and Y is optionally substituted C2-C3 alkylene, classified in class 548 and subclass 215+.

Group II claims 45-57 drawn to compounds in formula (II) wherein W is optionally substituted C5-C7 cycloalkyl, Z is C1-C2 alkylene, X is O, and Y is optionally substituted C2-C3 alkylene classified in class 548 and subclass 215+.

Group III claims 45-57 drawn to compounds in formula (II) wherein W is -CHR₁R₂ where R₁ and R₂ are independently selected from hydrogen, optionally substituted C1-C6 alkyl, optionally substituted C3-C7 cycloalkyl and optionally substituted aryl, Z is CH₂NH, and X is S, and Y is optionally substituted C2-C3 alkylene, class 548 and various subclass 146+.

Group IV claims 45-57 drawn to compounds in formula (II) wherein W is OR' where R' is optionally substituted aryl, Z is CH₂CH₂NH, X is S and Y is optionally substituted C2-C3 alkylene classified in class 548 and subclass 146+.

In accordance with 37 CFR 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. Again, this list is not exhaustive as it would be impossible under the time constraints due to the sheer volume of subject matter instantly claimed. Therefore, Applicant may choose to elect a single invention by identifying another specific embodiment not listed in the exemplary groups of the invention and examiner will endeavor to group the same.

The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed contain variables R', R1, R2, X, W, Y, and Z, which do not define a contribution over the prior art. The variables result in vastly different compounds when taken as a whole. Accordingly, unity of invention is considered to be lacking a restriction of the invention in accordance with the rules of unity of invention is considered to be proper.
